SUMMARY

Frontend Engineer with 3+ years of experience building scalable web and mobile applications using **React** and **React Native**. Specialized in cross-platform development with **React Native Web**, performance optimization, and production-grade UI architecture. Proven track record of improving **app stability**, **accessibility**, and **test coverage** in large-scale applications.

TECHNICAL SKILLS

Frontend: React, React Native, React Native Web, TypeScript, Redux Toolkit

Styling: Tailwind CSS, Material UI

Tools: Vite, Webpack, Nx, pnpm

Testing: Jest, React Testing Library

Concepts: Performance Optimization, Accessibility (a11y), Cross-Platform Architecture

Backend (Working Knowledge): Node.js, Express, MongoDB, Redis

EXPERIENCE

Carrier Global Technologies - Jun 2023 – Present

Consumer Portal Web (Web version of SmartHome App)

- Led development of a cross-platform application using **React Native Web**, enabling seamless web and mobile experience
- Implemented **deep linking** and **SEO optimisations**, improving search visibility and navigation.
- Increased **test coverage to 90%** using Jest and React Testing Library.
- Integrated analytics and event tracking to measure engagement.

SmartHome / HEMS App (React Native)

- Contributed to **React Native platform upgrade**, improving application stability and performance
- Enhanced app reliability by addressing real-world edge cases (Wi-Fi connectivity, scan interruptions)
- Delivered features across **authentication**, **device connectivity**, and energy management workflows
- Improved **accessibility with TalkBack support** for an inclusive user experience
- Implemented localization and unit handling for global consistency
- Maintained **production stability** through iterative fixes, reverts, and follow-ups

Support Portal – Full Stack Web App

- Built a web application using **React**, **TypeScript**, **Redux Toolkit**, and **Firebase Auth**.
- Enabled **real-time tracking** using **RTK Query** and browser geolocation.
- Designed a responsive UI using **Material UI** and **Tailwind CSS**.
- Integrated MongoDB geo queries, Redis caching, BullMQ, and i18n.

Carrier Service Tech App – Proof of Concept

- Built backend APIs and logic for fault detection using **Python** and **MongoDB**
- Designed a scalable API structure for modular expansion

PERSONAL PROJECTS

[DrawnGuess – Multiplayer Pictionary Game](#)

- Building a real-time multiplayer game using **Next.js**, **Prisma**, and **MongoDB**.
- Architecting **socket-based gameplay** logic for interactive user experience.
- Designed **interactive UI** for real-time gameplay and live updates

[CodeNest \(Work in Progress\) – Nx Monorepo for Full-Stack Experiments](#)

- Structured as an **Nx monorepo** with modular apps: personal portfolio, real-time chat prototype, and LiveSync system.
- Configured **Nx Cloud pipelines** to track build performance, cache outputs, and enable remote task execution.
- Built **reusable libraries** for shared components and themes
- Integrating **WebSockets** for real-time collaboration

EDUCATION

B.Tech – CSE, RGUKT IIIT RKV (CGPA: 8.4)

CERTIFICATIONS & ACHIEVEMENTS

- [Certified SAFe Agile Scrum Master](#)
- [AWS AI Practitioner – Amazon Web Services \(Coursera\)](#)
- [Supervised Machine Learning – Coursera](#)
- National-Level Yoga Competitor (SGFI)
