SUMMARY

Frontend Engineer with 3 years of experience building production **React Native** and **cross-platform** applications. Specialised in **React Native Web**, mobile performance, **accessibility**, and reliable UI architecture at scale. Delivered SmartHome (React Native), Consumer Portal (RN Web), and Support Portal (React). Shipped side projects, including ExecLens and Sprint Poker. Focused on stability, **test coverage**, and inclusive mobile experiences.

TECHNICAL SKILLS

Mobile: React Native, React Native Web, Expo, TypeScript, Redux Toolkit

Frontend: React, JavaScript, HTML, CSS, Next.js

Styling: Tailwind CSS, Material UI

Tools: Vite, Webpack, Nx, pnpm, Git, Jira, CircleCI

Testing: Jest unit test cases

Concepts: Cross-Platform Architecture, Performance Optimisation, Accessibility, i18n, Deep Linking

Backend (Working Knowledge): Node.js, Express, MongoDB, Redis, Firebase Auth

EXPERIENCE

Software Engineer • Carrier Global Technologies — Apr 2023 – Present | Hyderabad, India

SmartHome / HEMS App (React Native)

- Contributed to **React Native platform upgrade**, improving application stability and performance.
- Enhanced reliability by handling real-world edge cases (Wi-Fi connectivity, scan interruptions).
- Delivered features across **authentication**, **device connectivity**, and energy management workflows.
- Improved **accessibility with TalkBack support** for inclusive mobile UX.
- Implemented localisation and unit handling for global consistency.
- Maintained **production stability** through iterative fixes, reverts, and follow-up releases.

Consumer Portal Web (Web version of SmartHome App)

- Bootstrapped cross-platform web experience using **React Native Web**, Tailwind CSS, Webpack.
- Implemented **deep linking** and **SEO optimisations**, improving search visibility and navigation.
- Increased **test coverage to 90%** using Jest.
- Integrated analytics and event tracking to measure engagement.

Support Portal – Full Stack Web App

- Built a web application using **React**, **TypeScript**, **Redux Toolkit**, and **Firebase Auth**.
- Enabled **real-time tracking** using **RTK Query** and browser geolocation.
- Designed a responsive UI using **Material UI** and **Tailwind CSS**.
- Integrated MongoDB geo queries, Redis caching, BullMQ, and i18n.

Carrier Service Tech App — Proof of Concept

- Built a Python backend with MongoDB for fault detection logic and RESTful APIs.
- Designed a scalable API structure for modular expansion.

PERSONAL PROJECTS

[ExecLens](#) — *JavaScript Execution Visualizer*

- Shipped step-by-step visualizer for call stack, event loop, Promises, and async/await behaviour.
- Built with Next.js, TypeScript, and CodeMirror 6 — strong JS fundamentals that support RN debugging and async UI flows.

Code: github.com/Nvinod007/exec-lens

[Sprint Poker](#) — *Real-Time Agile Planning Tool*

- Built no-login planning poker: create room, share code, vote, reveal — live team updates.
- Shipped production app (Next.js, React, TypeScript, Supabase Realtime) after sprint estimation friction.

Code: github.com/Nvinod007/sprint-poker

[DrawnGuess](#) — *Multiplayer Pictionary (In Progress)*

- Shipped lobby flow: create/join rooms; building real-time drawing, guessing, and scoring.
- Architecting socket-based gameplay and interactive canvas UI for multi-player sessions.

Code: github.com/Nvinod007/drawnguess

[CodeNest](#) — *Nx Monorepo*

- Structured Nx monorepo with live portfolio app and shared libs for UI, types, and themes.
- Configured Nx Cloud for build caching and remote task execution across apps.

Code: github.com/Nvinod007/code-nest

EDUCATION

B.Tech — Computer Science & Engineering, RGUKT IIIT RKV | CGPA: 8.4 | May 2023

CERTIFICATIONS & ACHIEVEMENTS

- [Certified SAFe Agile Scrum Master](#)
- [AWS Certified AI Practitioner — Amazon Web Services, Apr 2026](#)
- [Supervised Machine Learning: Regression and Classification — DeepLearning.AI, Apr 2026](#)
